ABOUT US

ZF

Zaman Foolad Shargh Trading Group, backed by over 15 years of experience from its founders in the field of steel sections and constructional and industrial iron products, was established after years of valuable achievements and the empowerment of its dedicated and specialized team. Having successfully fulfilled the needs of various clients—from major national and international contracts to large-scale private projects—we set out to create a reliable, accessible, and distinctive company for our customers.

With the expansion of our operations across all steel product categories—including billets, beams, rebar, profiles, sheets, channels, and angles—we aim to be a trusted and capable partner in your projects. Furthermore, by launching a responsive customer service center and maintaining well-equipped covered warehouses, we strive to provide everything our clients may need in the constructional and industrial steel sector, sourced from the best suppliers and delivered in the shortest possible time.

Mission Statement

THE CORE PILLARS OF OUR BUSINESS

Product Authenticity

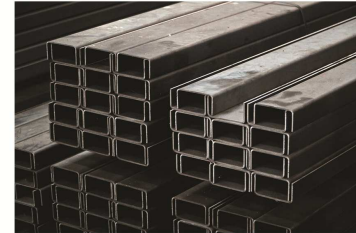

The authenticity of steel products plays a crucial role in ensuring their quality, safety, and durability. Identifying reputable manufacturers, verifying certifications, and reviewing technical specifications are key steps in confirming product authenticity. Purchasing from trusted sources helps prevent the use of counterfeit or substandard materials.

Integrity in Sales

Honesty in steel product sales lays the foundation for long-term trust between seller and buyer. Providing accurate information about quality, technical specifications, and the source of production is among the key indicators of honesty in this field. Transparent and honest sales not only lead to customer satisfaction but also strengthen the brand's credibility in the market.

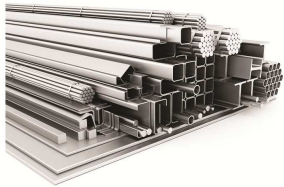

Money-Back Guarantee

A return guarantee in the sale of steel products reflects the seller's commitment to quality and customer satisfaction. It assures the buyer that in case of any mismatch with the stated specifications or technical defects, the product can be returned or exchanged. This approach enhances customer trust and ensures a secure and reliable purchasing experience.
